Cloud Security Solutions

Ensure your enterprise cloud environment is optimized for security and support at scale with Cloud Security Solutions that provide a secure foundation for business agility and responsiveness.

Overview

The enterprise is moving at the speed of cloud and older security measures can't keep up. With end users deploying multiple cloud applications to accomplish their work, requiring greater access to organizational resources across an ever-expanding number of devices, and increasing the need to protect sensitive data in the cloud, IT staffs find themselves struggling to deliver a level of cloud security that meets the demands of today's enterprise.
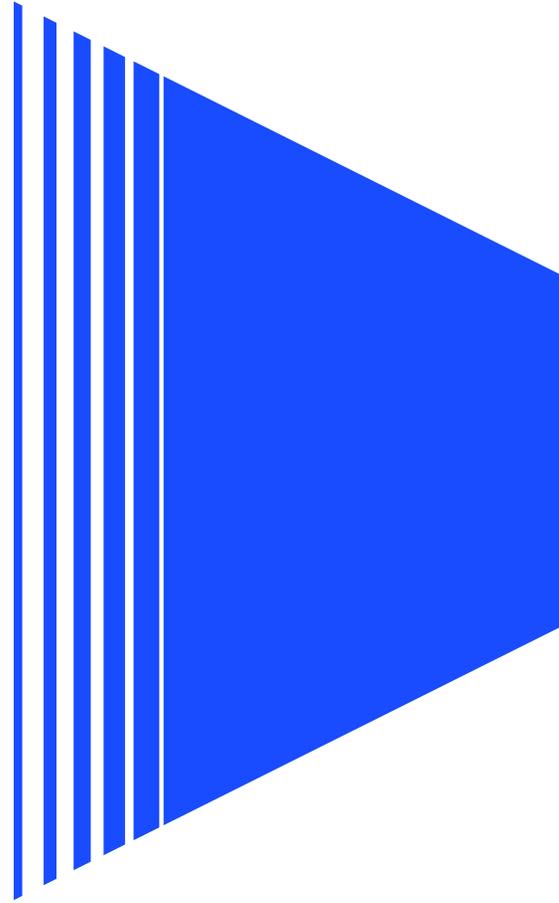

"As the new normal takes shape, all organizations will need an always-connected defensive posture, and clarity on what business risks remote users elevate to remain secure."[1]

Logicalis provides customers with the confidence that their current environment is optimized for security and support at cloud scale. We help them develop a secure cloud foundation to enable business agility and responsiveness. We can deliver a guardrail for future cloud deployments with embedded and automated security and identity management, compliance policies and procedures, and disaster recovery and continuity to avoid disruption.

Logicalis Cloud Security Solutions are based on a strong yet flexible security architecture and roadmap for the future that delivers a practical approach to the Zero Trust security model. Zero Trust is an enterprise security methodology offering CIOs, CISOs and IT teams a greater level of control into the access rights of users, devices, applications and enterprise resources.

Cloud Security Solutions

Get practical set of Cloud Security Solutions designed to integrate with your environment and provide you with a roadmap for improving your overall security posture over time.

- Security Assessment
- Central Identity
- App Discovery (Shadow IT)
- Infrastructure Monitoring
- Security State Monitoring
- Cloud Access Security Broker (SaaS and IaaS)
- Compliance Policy Management
- DevSecOps / Automation
- Cloud Workload Protection
- Data Protection

Logicalis Services

- Professional & Consulting Services
- Implementation & Integration
- Support & Maintenance
- Training
- Managed Services

Benefits

- **Get a modern cloud security solution for today's cybersecurity threats.** Logicalis Cloud Security Solutions are focused on providing a secure cloud foundation that is optimized for security and support at scale. Build a unique cloud security architecture that transcends older "on-prem" models.

- **Get a practical approach to enterprise security.** We recognize that you can't simply "rip and replace" the cloud environment, infrastructure and security architecture you currently have in place. Instead, we work with you to develop a specific plan and roadmap for improvement to increase your level of security maturity according to our four-level, Logicalis Security Maturity Model.

- **Learn how mature your organization's security is today and the practical steps for improvement you can take.** Take our Logicalis Security Maturity survey and learn about your organization's current security posture.

- **A comprehensive model for enterprise security.** Logicalis delivers comprehensive enterprise security services, including Endpoint, Network, Cloud, and Advisory Services (for Governance, Compliance and Risk).

Experienced Logicalis professionals work closely with you to thoroughly understand and define your needs and objectives. We'll help you fairly evaluate all your options and costs and then our highly certified engineers will design and customize a set of Cloud Security Solutions that precisely fits your organization. Our goal is that you achieve your desired business outcomes.
