Endpoint Security Solutions

Modern cyberthreats are targeting critical and vulnerable enterprise endpoints to access the network, its resources and data. Today's expanding enterprise demands modern Endpoint Security Solutions capable of preventing, detecting and responding to these threats.

Overview

Today's enterprise is an expanding infrastructure that is diverse both in device type and geo-location, with end users using desktop and mobile devices in the office and remotely, servers in the data center and the cloud, and new IoT devices at the edge. These critical and vulnerable enterprise endpoints require modern Endpoint Security Solutions capable of protecting, detecting, responding to, and coordinating security events among multiple enterprise endpoints and central locations.

Logicalis Endpoint Security Solutions are based on a strong yet flexible security architecture and roadmap for the future that delivers a practical approach to the Zero Trust security model, offering CIOs, CISOs and IT teams a greater level of control into the access rights of users, devices, applications and enterprise resources.

Our Endpoint Security Solutions use a security maturity model that can help you determine your requirements based on what you currently have in place and your business needs. Then we work with you develop a practical roadmap for improving your security posture that leverages your existing security technologies investments.

Endpoint Security Solutions

Get a practical set of solutions designed to integrate with your environment and provide you with a roadmap for improving your overall security posture over time.

- Modern Endpoint Protection
- Multifactor Authentication (MFA)
- System Hardening
- Vulnerability Management
- Exploit Prevention
- File Integrity Monitoring (FIM)
- Incident Investigation
- Data Loss Prevention (DLP)
- Privileged Access Management (PAM)

Logicalis Services

- Professional & Consulting Services
- Implementation & Integration
- Support & Maintenance
- Training
- Managed Services

Benefits

- **More than a point solution.** Build a platform for enterprise security – Logicalis Endpoint Security Solutions provide practical security tools that work with your existing security and can help take you to the next level in the Logicalis Security Maturity model.
- **A modern security solution for today's cybersecurity threats.** Logicalis Endpoint Security Solutions go beyond traditional endpoint protection (EPP) to provide modern endpoint detection and response (EDR).
- **A practical approach to enterprise security.** We recognize that you can't simply "rip and replace" the infrastructure and security architecture you currently have in place. Instead, we work with you to develop a specific plan and roadmap for improvement to increase your level of security maturity according to our four-level, Logicalis Security Maturity Model.
- **A practical roadmap for security improvement.** Our Logicalis Security Maturity Survey helps you learn about your organization's current security posture, then follow a roadmap for the future.

Experienced Logicalis professionals work closely with you to thoroughly understand and define your needs and objectives. We'll help you fairly evaluate all your options and costs and then our highly certified engineers will design and customize a set of Endpoint Security Solutions that precisely fits your organization. Our goal is that you achieve your desired business outcomes.
